ABOUT ME
ABOUT ME

North Geortexington
ALL LIVES HAVE EQUAL VALUE
Our vision is a U.S. postsecondary education system that propels social mobility and economic development.
We start with the student and the experiences we need to provide for them to be successful.

Two key aspects of this work are:

1. Identifying the critical elements of a successful student experience (addressing loss and momentum points)

2. Supporting systems and institutions in delivering that experience to millions more students
Identifying critical student loss and momentum points and invest in innovation

Deepening our understanding of the institutional change process

Leveraging data, measurement and evaluation as a critical tool for transformation

Engaging in policy advocacy at Federal and State
Greater connectivity to our K-12 work

Importance of institutional capacities for transformation

More deliberate exploration of future risks and opportunities to the sector
**Students**—and the value higher education creates for them—specifically low-income students and students of color

**Economics:** From nice to necessary

**Scale:** Balancing breadth and depth
BMGF AND JFF

Shared DNA

Shared Experiences

Shared Future
THANK YOU
